Architects

IMPORTANT FOR CONTRACTORS **DO NOT COVER UP WORK THAT NEEDS TO BE INSPECTED**

It is essential that works are not covered prior to the architect's inspection.

A set of 'inspection cards' were given to you at the commencement of the works and it is essential that works are inspected prior to any 'covering' in.

If this is not adhered to, covered works may require to be opened up and inspected at your expense.

ALL inspection cards need to be completed, as an example typical cases are given below (NOTE: this list is an example of a few - NOT all the cases):

- Radon barrier, foundation formwork & steel prior to concrete pour
- Airtightness requirements and insulation prior to plastering/ rendering/roofing
- Effluent treatment unit and Percolation/Polishing area before being filled.
